Introduction

Daboye Co., Ltd., established in 2011, is a specialized manufacturer of indoor LED lighting. We operate under our own brand, "Lighting Ever."

With in-house engineering capabilities and production facilities, we independently design LED lighting fixtures and develop our own drivers, all of which are manufactured directly at our factory in Paju, Korea (approximately 40 minutes from Seoul).

Our indoor LED lighting products are optimized through our extensive experience and technical expertise.

By applying flicker-free technology and a residual-glow prevention circuit, we have significantly reduced product failure rates.

Through meticulous after-sales service, we have also seen continuous growth in our loyal customer base.

Our indoor LED lighting lineup is divided into residential and commercial categories.

We offer a wide range of products suitable for various spaces and continue to develop new lighting solutions.

Our residential lineup includes lighting for living rooms, kitchens, and bedrooms, as well as bathrooms, verandas, and entrance sensor lights.

Our commercial lineup consists of 17 products, including Slim Edge lights in various sizes and recessed flat panel fixtures.

We offer standard, high-efficiency, and eco-friendly options.

The primary color temperatures we produce are 6500K and 4000K, and custom color temperatures are also available upon request.

The drivers used in our lighting products range from 15W to 60W, and we design and manufacture both non-isolated and isolated drivers in-house.

We are a leading provider of indoor LED lighting in the Korean domestic market, and through continuous technological innovation, we strive to deliver the most optimized lighting solutions.
