# Introduction

Daboye Co., Ltd. was established in 2011 as a specialized home lighting manufacturer.

Starting with the production of glass covers for lighting fixtures, we are the best LED lighting company that designs lighting fixtures and develops and designs converters (stabilizers) through our own technology development in line with the changing times of the lighting industry.

We are minimizing the product defect rate through our own technology development, and we are solidifying our image through friendly response and thorough after-sales management.

Our main products are divided into household and commercial products.

Home products include room lights, living room lights, kitchen lights, dining table lights (pendant lights), bathroom lights, entrance sensor lights, veranda direct lights, children's room lights, single lights, cross lights, bar lights, downlights,

modules and stabilizers for reform that are compatible with existing lights. There are 7 types of Slim Edge for commercial lighting.

Recessed flat lamp piece type / spring type 5 types

The ballast (converter), which is the heart of lighting, operates under 20W, 25W, 40W, and 50W.

It is manufactured directly in Korea.

We will constantly move forward and develop by sincerely communicating with you.

## DN Remote Control Lantern Launched!

It helps improve concentration and sleep well in one product

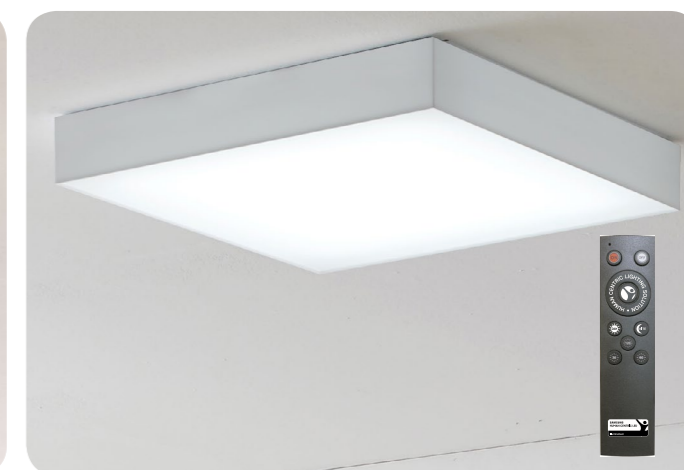

### LED lights to control melatonin to improve concentration and sleep well

The melatonin-controlled LED package is a product that controls the light of a teal wavelength that affects melatonin secretion, and the melatonin LED lighting product helps modern people, who have a high proportion of indoor life, freely design lighting environments according to their needs and purposes. Melatonin is a substance involved in the sleep cycle, and the human body activates the body by minimizing melatonin secretion during the day when there is a lot of sunlight, and helps you sleep well by secreting enough melatonin at night when there is little light.
